The exact amount of the Management Fee from the Co-Investors is negotiated on a case-by-case basis between the Co-Investors and the Managing Entity prior to joining the Investment. 7) PFR CVC allows for the possibility of reducing the Management Fee in the event of failure to meet the Milestones.

<p>21. Rules for accounting for proceeds from exits from Investments</p>	<p>The rules for accounting for proceeds from exits from Investments will depend on the Model under which the VC Fund operates, whereby in each model, Private Investors will be entitled to profit asymmetry ("Asymmetry") as an incentive to invest, i.e., a preferential share in the VC Fund's profit over the proportions resulting from the share in the VC Fund's capitalisation under Model 1 or from the share in the co-investment under Model 2. The product of the profit share, i.e., the level of profit asymmetry, is negotiated between the Managing Entity and the Private Investors/Co-investors.</p> <p>Model 1</p>

- 1) Proceeds are first returned up to the amount of contributions made to the VC Fund by Private Investors, the Managing Entity and PFR CVC (jointly, the "**VC Fund Investors**"), in proportion to their share in the VC Fund's Capitalisation – until 100% of their contributions are returned.
- 2) Proceeds will subsequently be returned to the VC Fund Investors up to the amount of the Minimum Rate of Return specified in the Investor Agreement.
- 3) The remaining funds (the "**Surplus**") will be distributed:
 - a. to the Managing Entity in the form of Carried Interest; then
 - b. to the VC Fund Investors in the following proportion:
 - (i) For the Managing Entity in proportion to its share in the Capitalisation;
 - (ii) For Private Investors – in proportion to their share in the VC Fund's Capitalisation, taking into account the Asymmetry, defined as the product **of 1.0-1.5x**, but not more than 80% of the amount representing the Surplus less Carried Interest;
 - (iii) For PFR CVC – in the form of the remaining proceeds.

Model 2 (Co-investment)

1. Individual Investments in the Companies are first settled (*deal-by-deal*) through the return of contributions made towards the Investment between the VC Fund and the Co-Investors.
2. Subsequently, the funds remaining after the return of contributions will be used to distribute profits to the Co-Investors and the VC Fund in the following proportion:
 - (i) A share in the profit for the Co-Investors – in proportion to their share in the Investment, taking into account the Asymmetry, defined as the product of **1.0-1.35x**;
 - (ii) A share in the profit for the VC Fund – in the form of other proceeds. At the level of the VC Fund level, the settlement is made as follows:
 1. Proceeds are first returned up to the amount of contributions made by the VC Fund's Investors, in proportion to their share in the VC Fund's Capitalisation – until 100% of their contributions are returned.
 2. The Surplus will be distributed:
 - a. to the Managing Entity in the form of Carried Interest; and subsequently
 - b. to the VC Fund Investors, in proportion to their share in the VC Fund's Capitalisation.

<p>22. Additional remuneration of the Managing Entity ("Carried Interest")</p>	<p>With respect to the VC Funds operating under Model 1, the amount of Carried Interest will be proposed by the Tenderer, but it should not exceed 30%.</p> <p>With respect to the VC Funds operating under Model 2, the amount of Carried Interest will be proposed by the Tenderer, but it should not exceed 30%, with the provision that if the VC Fund operating under Model 2 fails to carry out at least 75% of the Investment with Corporate Investors as Co-Investors by the end of the Investment Period, Carried Interest will be reduced to 20%.</p> <p>For the avoidance of doubt, the level of 75% of the Investment with Corporate Investors as Co-Investors is understood as the ratio of the total amount of funds of Corporate Investors as Co-Investors transferred to the Portfolio Companies under all Investments to the total amount of funds transferred to the Portfolio Companies by all Co-Investors by the end of the Investment Period:</p> <table border="1" data-bbox="453 869 1355 1193"> <thead> <tr> <th data-bbox="453 869 903 1021">Level of Investment with Corporate Investors as Co-Investors</th> <th data-bbox="903 869 1355 1021">Amount of Carried Interest</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 1021 903 1106">Less than 75% (not less than 60%)</td> <td data-bbox="903 1021 1355 1106">20%</td> </tr> <tr> <td data-bbox="453 1106 903 1193">From 75%</td> <td data-bbox="903 1106 1355 1193">Up to 30%</td> </tr> </tbody> </table> <p>Under Model 2, the Co-investors with whom a settlement will be carried out upon exit from the Investment in a particular Company (<i>deal-by-deal</i>) may allocate part of the profit to Carried Interest for the Managing Entity, which is transferred to a special escrow account and paid to the Managing Entity in full, if the portfolio settlement of the entire VC Fund results in a full return of the contributions made to the VC Fund by the Managing Entity and PFR CVC. The amount of Carried Interest is negotiated on a case-by-case basis between the Co-investor and the Managing Entity prior to the Investment, and the amount of Carried Interest from the Co-investor should not exceed 30% and should take into account a rational approach to the relationship between the level of Carried Interest and the management fee from the Co-investors.</p>	Level of Investment with Corporate Investors as Co-Investors	Amount of Carried Interest	Less than 75% (not less than 60%)	20%	From 75%	Up to 30%
