Program model

- LP & Co-investment model

Funds we consider

Growth Equity, Late-Growth

Form of investing

Equity, Quasi-Equity

Time horizon

5 + 5 + (1+1)

Identifying an issue

Key statistics (Poland)

43 100

Fatalities in 2016 as a result of air pollution (according to the report "Air quality in Europe 2019")

9 mld
PLN

Polish economy is losing every year as a result of weather anomalies caused by suspended dust.

+18%

The emission of greenhouse gases to the atmosphere produced by Polish households is so much higher (compared to the EU average).

24 / 27

Place in the EU in terms of material efficiency, water and energy consumption and greenhouse gas intensity.

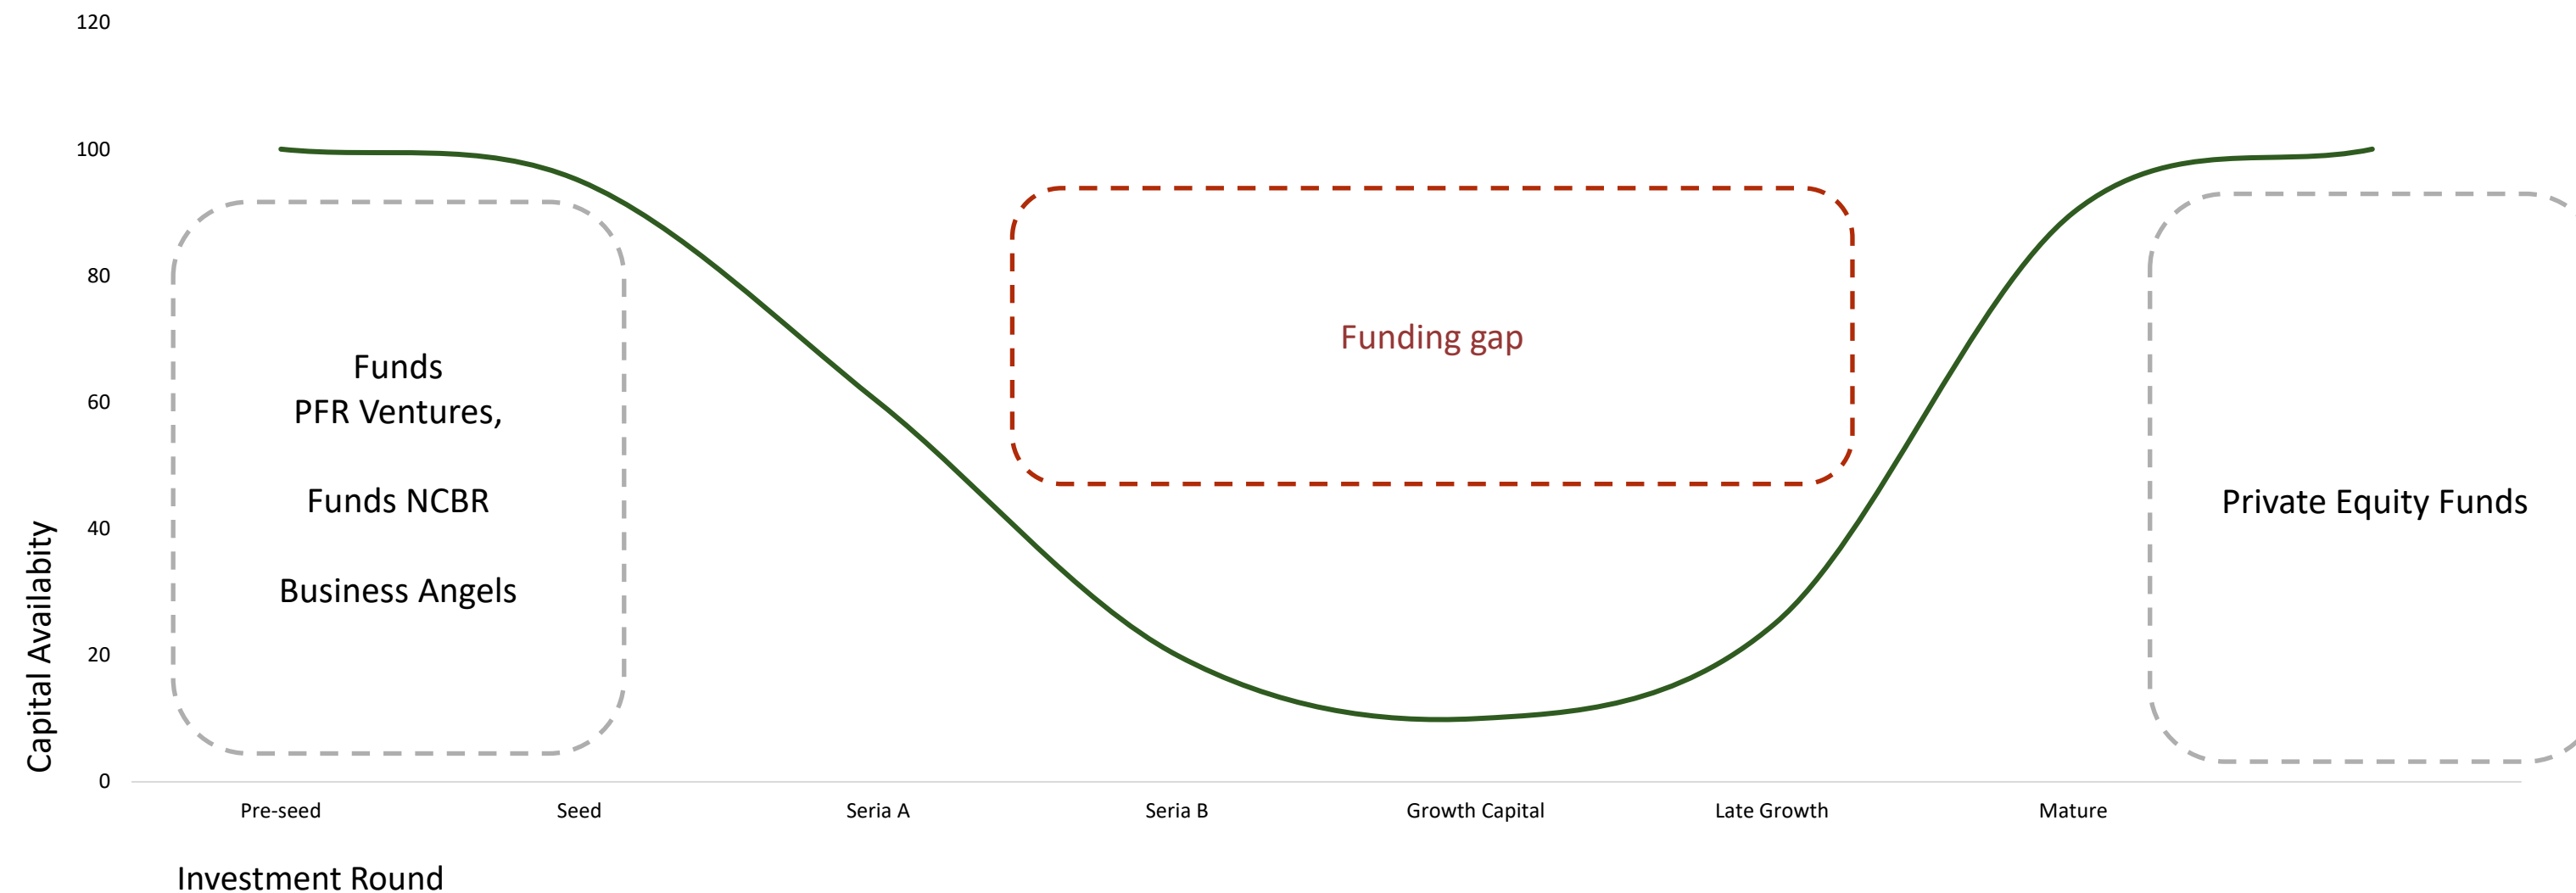

“

The average annual concentration of suspended dust in urban areas in Poland makes Poland one of the most polluted countries in the entire European Union.

”

One of the goals of PFR GreenHub is to identify a social problem and take an initiative to counteract global climate change.

Rationale behind the program

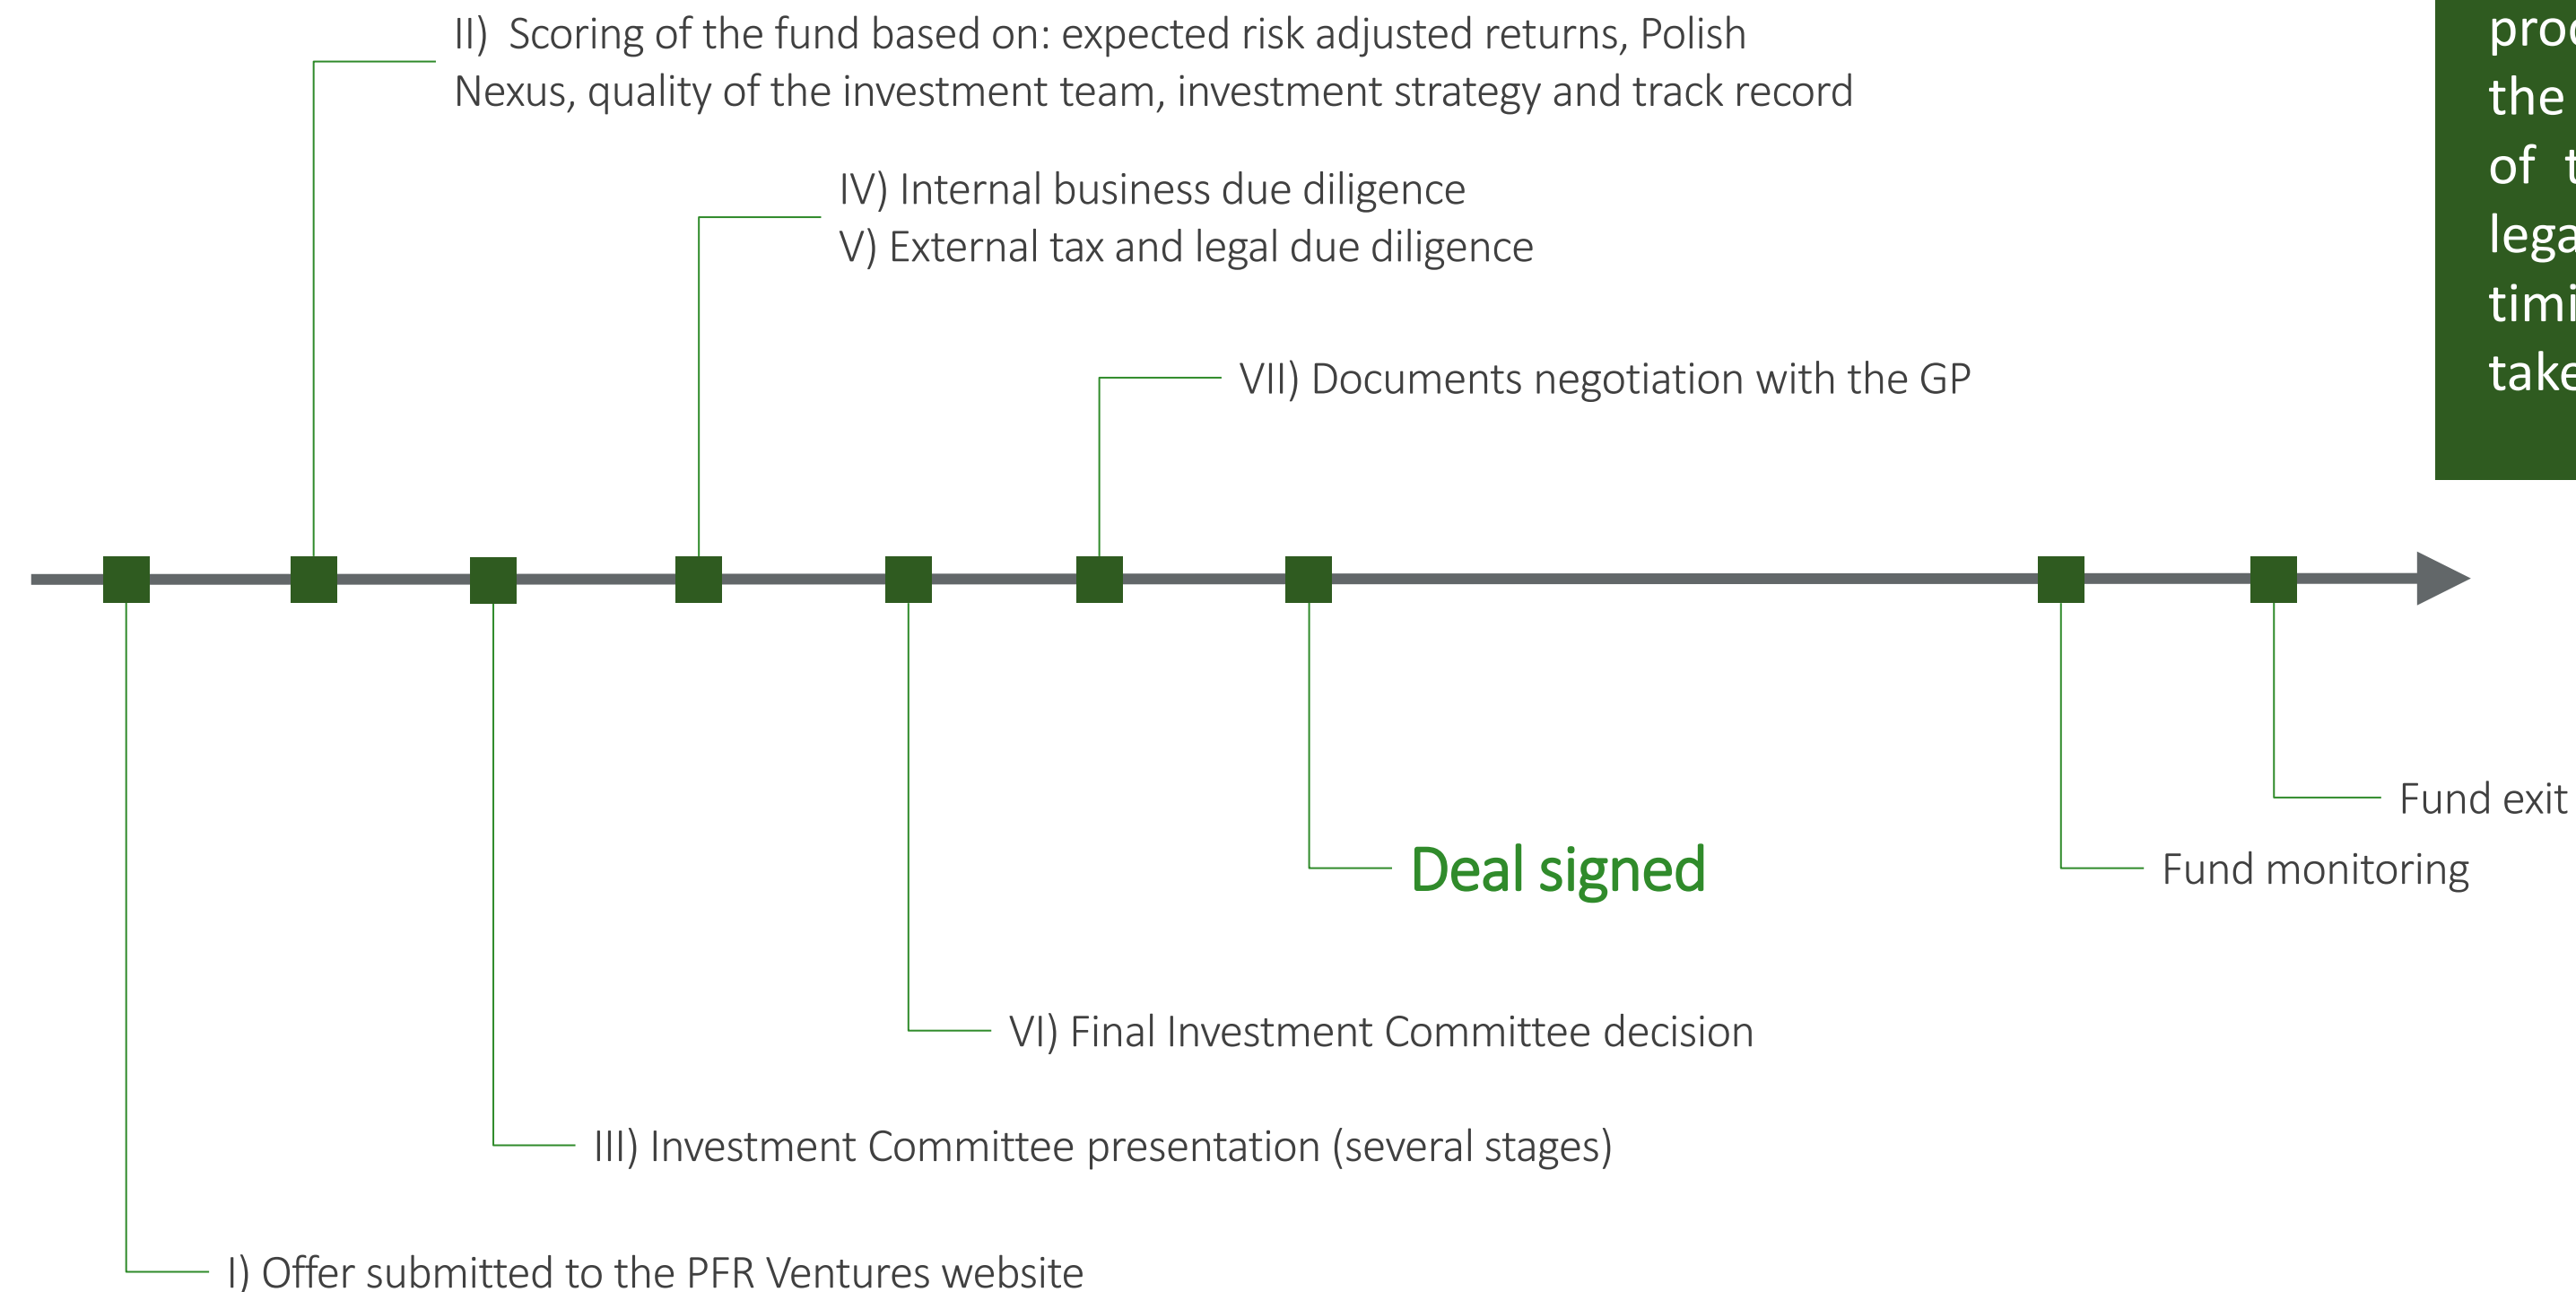

#1 Climate tech startups due to their capital intensity particularly notice the capital gap on the Polish VC market. PFR GreenHub aims to close the equity gap through the FoF or co-investment model.

#2 In Poland, as in other European countries, there are many financing options available both for startups at an early stage of development (startup / seed) as well as for mature enterprises but there exists a funding gap for growth/late growth financing

Investment timeline

From 3 to 6+ months

The average time of analysis, due diligence, negotiation and completion of the entire process depends primarily on the quality of the application and relevance. Evaluation of the General Partner requires in-depth legal, tax and business due diligence and timing varies. Occasionally this process may take more than 6 months.
